

SuperFOIL

GENERAL PURPOSE WRAP

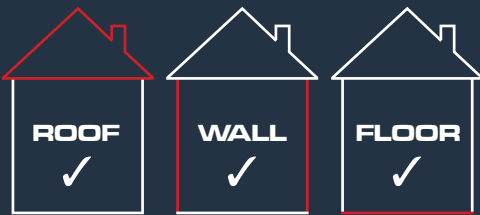

DIY REFLECTIVE INSULATION FOR USE IN ROOFS, WALLS & FLOORS

STAY WARMER IN WINTER AND COOLER IN SUMMER

HELPS TO PREVENT MOULD & DAMP

WATER & VAPOUR RESISTANT

REDUCE DRAUGHTS & COLD UNDERFOOT

KEY FEATURES

- SF General Purpose wrap is a leading multi-layer air bubble insulation with aluminium bonded to the outer surfaces. The coated aluminium faces offer durability and protection against corrosion to give a waterproof insulation system.
- One in a range of SuperFOIL products designed to maximise insulation performance with a quick and easy installation.
- Reflects heat, just like a mirror reflects light. SFBA is an ideal radiant barrier for supplementing existing insulation to keep your house warmer in winter and cooler in summer.
- Can be used for insulating roofs, under floor and walls as part of a dry lining system.
- Can also be used in greenhouses and other industrial applications.
- Waterproof and resists the passage of moisture through walls, floors and ceilings.
- Utilises low emissivity air gaps to maximise the thermal performance.
- Enhances U-values in traditional construction to meet and/or exceed current Building Regulations.

TECHNICAL

| DESCRIPTION | |
|-------------|------------------------|
| Layers | 3 |
| Width | 1m |
| Length | 7m |
| Colour | Reflective Silver Foil |
| Packing | 142 Poly Tube Bag |

| SPECIFICATION | DATA |
|---------------------------------|--|
| Performance | "Roof R Value" = 0.97 "Wall R Value" = 1.33 "emmissivity" = 0.03 |
| Resistance to water penetration | BS 4016 - Pass |
| Hydrostatic head | EN 20811 > 1000cm |
| Tensile strength | EN 12311-1 L:322 W:273 |

SuperFOIL MP Standard tape

FAST & EASY INSTALLATION

IMPROVES ENERGY PERFORMANCE

RESISTS THE PASSAGE OF MOISTURE

IMPROVES AIR-TIGHTNESS

FLEXIBLE & ECONOMICAL

REDUCES IMPACT NOISE

ROLL SIZE

100MM X 20M
